For the first two stations (Not included on this map) — donning structural PPE (station A) and ropes and knots (station B) — competitors are required to wear full NFPA-approved turnout gear including coat, pants, helmet (with skull cap), firefighting gloves, leather or rubber (steel toe/shank/shin guard) boots and Nomex hood. All department/school names must be removed/covered prior to the competition.
*NOTE*

Times listed in Technical Standards are for the National SkillsUSA course and will be modified to fit the State course.

For the remaining eight stations (the CPAT testing activities), contestants will be allowed to change from the official SkillsUSA competition uniform. Contestants must wear long pants, a T-shirt and sneakers while performing in the CPAT. These 8 stations will be completed while wearing a 45-50lb weighted vest to simulate turnout gear and air pack. The CPAT testing activities include:

1: Complete a stair climb equivalent to 4 stories with a 25lb hose pack.
2: Place a ground single ladder at the fire scene and extend and lower fly section of an extension ladder.
3: Stretch uncharged hose lines around obstacles.
4: Remove tools from fire apparatus and carry to fire scene.
5: Demonstrate ability to force entry into a structure using a sledge hammer.
6: Remove victim from fire scene by demonstrating a rescue drag.
7: Demonstrate pulling a ceiling down and away with a pike pole.
8: Complete search functions by crawling through dark unpredictable areas to search for victims.
